PROFESSIONAL SUMMARY

MCA graduate with an AI/ML internship and three full-stack projects. Skilled in Python, SQL, JavaScript, Flask, machine learning, and database development. Hands-on experience in web application development, ML model implementation and database management. Seeking an entry-level IT opportunity to apply my skills and grow professionally.

EDUCATION

Vivekananda College of Engineering & Technology

Master of Computer Applications – CGPA: 8.92/10

Puttur, India

Dec 2024 – Jun 2026

Vivekananda College of Arts, Science and Commerce

Bachelor of Computer Applications – CGPA: 8.47/10

Puttur, India

Jun 2021 – Jul 2024

TECHNICAL SKILLS

Programming: Python, JavaScript

Web Technologies: HTML5, CSS3, Bootstrap, Flask, Django

Database Technologies: SQL, MySQL, SQLite

Libraries & Frameworks: Pandas, NumPy, Scikit-learn, OpenCV

Development Tools: Git, GitHub, VS Code, Google Colab, Jupyter Notebook, XAMPP, Microsoft Excel

Soft Skills: Problem Solving, Time Management, Communication, Team Collaboration

INTERNSHIP EXPERIENCE

ERA Foundation

Feb 2026 – May 2026

Data Science and AI/ML Intern | Python, AI, Machine Learning

Mangalore, India

- Developed **Data Science and AI/ML solutions using Python**, performing **data preprocessing, feature preparation, model development, and evaluation** for real-world datasets.
- Built and tested a **credit scoring and loan eligibility prediction application** using machine learning, validating model outputs across different customer input scenarios.
- Worked with **SQLite databases** for data storage and management, integrated trained models into applications, and performed testing and debugging to ensure reliable functionality.

PROJECTS

AI-Powered Grocery Expiry Prediction and Tracking System | Python, Flask, ML, OCR

Nov 2025 – Dec 2025

- Developed a **Flask-based grocery inventory system** using **OCR and OpenCV** to extract product information and expiry dates from packaging images, with dashboard alerts and automated status tracking.
- Implemented **four machine learning models** for expiry and product prediction using Scikit-learn, achieving **97.42% test R^2** for days-to-expiry prediction and **99.00% test accuracy** for expired-soon classification.
- GitHub Repository:** github.com/prajna02/Grocery_Expiry_Tracker

FarmEasy | HTML, CSS, JavaScript, Bootstrap, PHP, MySQL

May 2025 – Aug 2025

- Developed a **full-stack farmer support platform** using **PHP and MySQL**, providing crop guidance, weather forecasts, farming services, user authentication, and a digital marketplace.
- Implemented **marketplace product listing, image uploads, shopping cart, and order management** with frontend-backend communication and third-party API integration for weather and location-based services.
- GitHub Repository:** github.com/prajna02/FarmEasy

Web-Based Bakery Management System | HTML, CSS, JavaScript, PHP, MySQL

May 2025 – Jul 2025

- Developed a **full-stack bakery management and online ordering system** using **PHP and MySQL**, implementing role-based authentication, product CRUD operations, shopping cart, checkout, and order management.
- Implemented **JSON-based APIs, database transactions, and security features** including bcrypt password hashing, CSRF protection, prepared statements, and session-based authorization for customer and admin workflows.
- GitHub Repository:** github.com/prajna02/Bakery-Management-System

CERTIFICATIONS & ACHIEVEMENTS

- Data Science and AI/ML Internship Certificate – ERA Foundation, Mangalore (2026)
- Presented a paper on “Machine Learning-Based Grocery Expiry Prediction and Tracking System” at TECHNOVA 2025
- Participated in an internal hackathon organized by the Department of MCA
